JPGR
Journal of Plant Growth Regulation

Volume 22, 2003

EDITOR-IN-CHIEF

Jutta Ludwig-Mueller
Dresden University of Technology
Institute for Botany, Germany

EDITORIAL BOARD

James D. Anderson
USDA, Plant Sciences Institute, USA

Michael Christianson
University of California-Berkeley, USA

Horace G. Cutler
Mercer University, USA

Simon Gilroy
Pennsylvania State University, USA

Gretchen Hagen
University of Missouri, USA

David E. Hanke
University of Cambridge, United Kingdom

Peter Hedden
Rothamsted Research, United Kingdom

Tuan-Hua David Ho
Washington University, USA

Vivian Irish
Yale University, USA

Thomas Jacobs
University of Illinois, USA

Alan Jones
University of North Carolina, USA

Olavi Juntilla
University of Tromso, Norway

Masayuki Katsumi
International Christian University, Japan

Joseph Kieber
University of North Carolina, USA

Frederick Meins
Friedrich Miescher Institute, Switzerland

James B. Reid
University of Tasmania, Australia

Joseph Riov
The Hebrew University of Jerusalem, Israel

Gary W. Stutte
NASA, USA

Thomas Vogelmann
University of Vermont, USA

Claus Wasternack
Institute for Plant Biochemistry, Germany

MANAGING EDITOR

Suzann McClenahan
University of Wisconsin, USA

Subject Index to Volume 22, 2003

Abscisic acid 3, 25, 32, 73, 109, 176, 185, 289
Agrobacterium tumefaciens 240
Aleurone 126, 176, 185
α-amylase 126, 176, 185
1-Aminocyclopropane-1-carboxylic acid synthase . . 109
Anther development 176
Anticancer plant 205
Apical dominance 240, 276
Arabidopsis 25, 82, 126, 134, 141, 152, 163, 185, 195, 240, 253, 298
Auxin herbicides 109
Auxin overproduction 240
Auxin signaling pathway 3
Auxin transport 109
Auxins 32, 73, 99, 259

B ring analogs 350
Barley 163, 217
Basic leucine zipper (bZIP) protein 195
Benzyladenine 205
Branching 15, 276
Brassinazole 259, 336
Brassinolide 259, 276, 325, 350
Brassinosteroid biosynthesis 325
Brassinosteroid biosynthesis inhibitors 336
Brassinosteroid mimetics 350
Brassinosteroid mutants 325
Brassinosteroid signal transduction 298, 313
Brassinosteroid signaling 325
Brassinosteroids 3, 25, 47, 259, 276, 289, 350

Ca^{2+} -ATPase 126
Calmodulin 126
Camptotheca acuminata Decaisne (family Nyssaceae) . 205
Camptothecin 205
Castasterone 276
Cell differentiation 276
Cell division 47, 276
Cell elongation 195
Cell expansion 276
Cell wall-modifying enzymes 313
Chemical genetics 336
Chloroplast degradation 217
Chromatin condensation 217
Common sorrel 228
Crops 325
Cyanide 109
Cytokinin signaling pathway 3
Cytokinins 32, 73

Decapitation 99
De-etiolation 3
Defense response 47
Defense signaling pathway 82
DELLA proteins 134
Dioecious plants 228
Disease 82
Dormant seeds 25
DWF4 protein 336

Early 13-hydroxylation pathway 228
Early 3β, 13-hydroxylation pathway 228
Elongation 99, 134, 259
Endogenous rhythms 276
ent-kaurene oxidase 195
Environmental stress 289
Enzyme-linked immunosorbent assay (ELISA) 228
24-Epibrassinolide 276
Epinasty 240
Ethylene 3, 25, 32, 47, 73, 82, 289
Ethylene biosynthesis 109

Fertilization 73
Flavonoids 47
Floral initiation 176
Flowering 15
14-3-3 proteins 195
Fruit development 73

G protein 126
GA insensitive (*GAI*) gene 134
GAI repressor 152
GAMYB transcription factor 176, 185
Gas chromatography-selected reaction monitoring (GC-SRM) 228
Gene expression 99, 176, 185, 313
Genomic effects 313
Germination 176
Gibberellin biosynthetic gene 195
Gibberellin content 228
Gibberellin response element 176
Gibberellin signal transduction 141
Gibberellin signaling 126, 134, 152, 163, 176, 185
Gibberellins 3, 25, 32, 47, 73, 99, 259
Glycogen synthase kinase 3 298

Herbicides 109
Herbivores 82
Heterotrimeric G protein 126
28-Homobrassinolide 276
Hordeum vulgare 217
Hormone cross-talk 25, 185, 276
Hormone interactions . 25, 32, 73, 82, 99, 109, 259, 289
Hormone signals 47
Hormones 3
Hypocotyl elongation 259

iaaH gene 240

iaaM gene 240
Indole-3-acetic acid 3, 99, 109, 240
Inflorescence 228
Inflorescence stems 253
Inositol-1,4,5-triphosphate 126
Internode elongation 99, 134
Intracellular protein phosphorylation 313

Jasmonic acid 47, 82, 289

LE gene 99
Leaf senescence 217
Leucine-rich-repeat receptor-like kinase 298
Light 3
Lignification 276
Long-distance signaling 15

Maize 217
Master regulators 15
Mesophyll cells 217
Metabolic deactivation 350
Methyl ether analogs 350

Naphthalene acetic acid 205
Necrotic spots 240
Networks 15
Nitric oxide 47
Nitrogen deprivation 32
Nod factors 47
Nodulation 15, 47
Novel signals 15
Nuclear export 195

O-GlcNAc transferase (OGT) 163
Organ growth 259
Organogenesis 47
Ovary 73

Paclobutrazol 152
Pathogens 82
Pea 73, 99, 325
Peptide signals 47
Petunia 163
Phenotypic variability 276
PHOR1 152
Phosphorylation 141
Phosphorylation cascade 298, 313
Photoperiodism 276
Phototropism 276
Phytohormones 15
Phytotropins 109
Pigment content 217
Pisum sativum 73, 99, 325
Plant defense 47, 82
Plant defense responses 289
Plant development 15, 163, 276
Plant hormones 47, 73, 276
Plasma membrane receptor kinases BRI1 and BAK1 313
Plasma membranes 126
Polar auxin transport 240
Pollination 73
Potato 152
Proteasome degradation 152
Proteasome 134
Protein degradation 141, 152

Quinclorac 109

Reactive oxygen species 47
Receptor heterodimerization 298
Regenerative xylem 253
Repression of shoot growth (RSG) protein 195
Repressor of gal-3 (RGL1) gene 134
Reproductive physiology 276
RGA-like 1 (RGL1) gene 134
RGA-like 2 (RGL2) gene 134
RGA-like 3 (RGL3) gene 134
Rice 163, 325
Rice dwarf (*d1*) mutant 126, 141
Rice *GA-insensitive dwarf* (GID2) mutant 141
Rice leaf lamina inclination bioassay 350
RING finger protein 152
RNAi 185
Root development 240
Rumex acetosa 228

Salicylic acid 47, 82
SCF complex 141
Seed development 25, 176
Seed germination 134
Seedlings 259
Senescence 276
Sex determination 228
Side chain analogs 350
Signal transduction 152, 176, 298
Signal transduction pathway . . . 82, 141, 163, 185, 313
Signaling interactions 47
Slender rice 1 (*SLR1*) mutant 141
SLN gene 99
SLR1 gene 141
Soil compaction 32
Soil drying 32
Soil flooding 32
SPINDLY (SPY) locus 163
Stem elongation 176
Steroid signaling 298
Stomata 32
Stress responses 289
Systemic acquired resistance 47

Target gene 195
Tetratricopeptide repeat (TPR) proteins 163
Thermotolerance 289
Tobacco transcriptional activator 195
Tomato 73, 325
Transcriptional regulation 195
Transgenic *Arabidopsis* 240
Transmembrane receptor kinases 298

U-box arm repeat protein PHOR1 152
Ubiquitin ligase 152
Ultrastructure 217
Upstream regulatory molecule SLN1 185
Uridine 47

Vascular differentiation 240
Vascular regeneration 253

Wound healing 253

Xylem 253

Zea mays 217
